Assistance during internal or external audits

Provider Enrollment Credentialing and Contracting are vital to your organization's financial success.

The trusted credentialing specialists at Catalyst Consulting have the experience and know-how to handle this important aspect of your business operations.

Our proprietary software allows you, the Client, to keep track and monitor the progress of your project along the way.

Credentialing and Contracting are not a choice – they are required for providers to bill and collect for their services. Why risk this important process being done incorrectly?

With our experience and extensive fee schedule database, we are able to advise you of the contract rates being assigned to you and how that compares to your peers.

We assist existing practices with obtaining and interpreting current fee schedules in order to track and monitor allowables vs. payments.

We help you to make informed business decisions that will affect your bottom line for years to come. Let us help you through this arduous process and take the burden off of you and your staff so you can focus on patient care.
